XBundle is a litigation support company created by legal professionals. We excel at building electronic bundles, electronic trial presentation and fully supporting in-person, hybrid and remote hearings with tech and same-day or real-time transcription. We are a legal service business that is here to help you through every step of the litigation process, from the first data collection to the judgment. XBundle is the only organisation that can provide a genuine end-to-end service under one roof.

XBundle was originally created by Robert Onslow, an IP/IT barrister at 8 New Square Chambers, who became increasingly frustrated with the growing size of paper bundles. He developed an innovative electronic bundles and trial presentation software. Sadly, Robert passed away in 2016, but his vision for XBundle lives on.

Today, XBundle continues to develop and implement advanced practical solutions for leading law firms, corporations and government organisations. The philosophy behind XBundle remains the same: *"If it not as good as paper, then you are right to reject it."*

XBundle is owned and operated by legal professionals, with an average of over 30 years' experience of working and delivering in the legal and technology sector. XBundle thrives in enabling legal teams and corporate organisations to ensure that they have an effective platform and the highest level of support when they need it. We work when the litigation teams work. We understand the pressure our clients face when dealing with a tight deadline. We are always here to support our clients.

XBundle offers eDisclosure as SaaS or a full managed service. XBundle has a team of eDisclosure experts that can assist you with every aspect of your case. From technology selection, to setting up and managing technology assisted reviews, designing workflows, chronologies, data collection, data processing and data hosting; we have the skills, experience and technical know-how to ensure you collect and process the relevant data you need.

More than a technology company, XBundle consist of a team of highly trained legal experts with more than 30 years of experience in managing a huge variety of different cases, clients and challenges. XBundle is proud to adopt a tailored approach to every case. Whether this is driven by information security requirements, software functionality, or workflow management, XBundle has the capability to adapt to each and every situation. Regardless of the challenge, it is our teams' commitment, knowledge and expertise to our clients that delivers outstanding results time after time.

"We were extremely impressed with XBundle who delivered our demanding objectives on time, at short notice and at proportionate cost. Mark and the team are affable, knowledgeable and driven. We would not hesitate to instruct XBundle again." **Jon Scally, Senior Associate, Hill Dickinson LLP**

Software Information

XBundle::Create - Key features and benefits

[XBundle::Create](#) is a unique software explicitly designed to give legal teams the ability to create their own court-ready electronic document bundles.

Unlike other platforms, **XBundle::Create** has been built out of our original in-house utilities and is now offered for client use. Clients gain the unique advantage of an effective platform coupled with the highest level of support when needed.

XBundle::Create (a SaaS platform) has two key modules: The create layer and the presentation layer.

The 'Create' Layer .

The Create Layer is hyper focused on the creation of smart electronic bundles and has several key features

- **Drag and drop** - Build bundles quickly and efficiently with simple drag-and-drop technology.
- **Export to PDF** - Trial-ready bundles can be exported to PDF or viewed within the platform in real-time.
- **Dynamic Cross Referencing** - Dynamic cross-referencing that automatically updates when you add new documents to a bundle, meaning you only need to create cross-references once.
- **Page Ranging** - Automatic page ranging, including automatic suffixing of insert pack documents.
- **Effortless page assembling** - instant indexes, hyperlinks, and bookmarks.
- **Intuitive Hosting Platform** - View and present all your 'active' matters within the one platform.

Expert Presentation Functionality

- ❖ **Side by side viewing** - View two full A4 pages side-by-side or switch to one page mode.
- ❖ **Annotation options** - Annotations can be made before and during the trial and will be saved for an individual user or user group, with custom permissions.
- ❖ **Collaborate** - Work seamlessly with the case team, counsel, and stakeholders.
- ❖ **Powerful search** - Powerful search options including full keyword search within documents or annotations.
- ❖ **Work as a team** - Collaboration tools that make it easy to share notes and work as a case team.
- ❖ **Version control** - We make it easy to make last-minute changes and ensure all documents are the latest versions.

XBUNDLE

Who are we and what do we do?

XBundle is:

- ❖ An electronic trial bundle presentation and document bundle assembly software development & sales company.
- ❖ A litigation software suite designed to help legal teams efficiently produce high quality, professional electronic document bundles and present them in court.
- ❖ A cross industry and practice area tool which can be used in bankruptcy claims, real estate, M&As, class actions, construction, RFPs & tenders, corporate documents, medical records – any use case in fact where documents need to be assembled into bundles or sets.
- ❖ A post review tool.
- ❖ A tool for exporting electronic documents into print ready PDF sets, bookmarked PDFs or electronic presentation sets.
- ❖ An offline, non-cloud dependent electronic court room evidence presentation tool which displays 2 sheets of A4 sized paper side by side without any scrolling or zooming. Think Opus2 Magnum but much better.
- ❖ A software suite which is end user friendly without any need for external vendor involvement. Cuts out delays and having to educate a vendor about your case.
- ❖ A simple licensing model on a per user per case basis for evidence presentation and a one-off perpetual licence, with annual maintenance/update/upgrade fees, for the assembly module.

XBundle – as good as paper but better!
