Company Description

Established in 2007, the **blu** Gruppe team of >300 employees deliver complex and cross-thematic IT and management services and solutions.

**blu Eye GmbH**, part of the **blu** Gruppe AG, is an independent provider of **Investigative Technology Services & Solutions** specialised in digital Governance, Risk & Compliance (GRC).

Under our brand GRC.FIT, we unite our core competencies:

- Cyber-Security**
- Data Protection**
- Asset Lifecycle Management**
- Digital Forensic**

Our team of **IT auditors, computer scientists, lawyers & forensic, security & compliance experts** have years of multicultural experience in national and international projects.

In support of our services, we employ **market leading digital GRC applications** to deliver efficient, consistent, accurate and expedited results, enabling our clients to provide **proof of implementation, compliance, and effectiveness of measures** in accordance with applicable GRC guidelines and requirements of customers, suppliers, auditors, and government agencies.

We offer software licensing, technical implementation, and integration services as well as operational support and provide our solutions and services **on-premise**, in the **cloud** and primarily as **Managed Service**, combined with our independent GRC consultancy.

While we **focus on small & medium-sized businesses (SME)** in **central Europe**, our customers also comprise of renowned national and international corporations, public sector organizations, audit, and law firms.

We apply best practices, industry guidelines and standards in our pragmatic, collaborative and hands-on approach while taking our clients corporate culture into account.

**blu Eye** services are tailored to client's project requirements at **flexible pricing models**.

## Vendor Offerings

**blu** Eye investigative technology services & solutions supports the improvement and optimization of investments, reduces, and prevents risks, cyber threats, and governance violations, protects corporate assets, and identifies and remediates vulnerabilities.

We will help you get and stay GRC.FIT...
