8.2.42 <u>Relativity</u>

RelativityOne Overview

Whether it's litigation, information governance, a government request, or an internal investigation, RelativityOne gives you a complete set of flexible tools in a secure cloud platform to tackle your unique challenges through every phase of a project.

Keep Your Data Safe – Centralise your data and reduce risk with a SaaS solution backed by Relativity Trust, a security program that goes far beyond standard data security and privacy certifications. With preventative defense, automated processes, and transparent operations, RelativityOne keeps customers' most sensitive data protected.

Leverage Cloud Elasticity – Don't worry about maintaining infrastructure or keeping up performance during peak times – it's all covered by RelativityOne.

Use a Single Solution – Start and finish e-disclosure in one solution with a single audit trail. No risky data transfers required.

Support e-Disclosure around the World – RelativityOne is available in the US, UK, Hong Kong, Canada, Brazil, and the Netherlands.

Built on Microsoft Azure - Benefit from the scalability, redundancy, and international reach of the Microsoft Azure cloud, as well as the continual investment, innovation, and commitment to [security](#) Microsoft puts into it.

Integrate with Microsoft Office 365® - Seamlessly move data from Office 365 to RelativityOne to get your review up and running quickly.

Capabilities

Legal Hold – Fully integrated into Relativity, Legal Hold is a simple solution for a complex enterprise challenge that enables you to create a defensible, repeatable process for managing legal holds. Streamlined and automated workflows mean any team – legal, IT, or HR – can run their unique legal hold processes in Relativity. Additionally, every correspondence can be created from scratch, or built using existing templates, while built-in reports and dashboards provide real-time insight.

Collection – For legal teams and e-discovery professionals who want to quickly and securely get data from the cloud into review, RelativityOne Collection enables you to pull data from Office 365 directly into RelativityOne. With most enterprise data stored in Office 365, Collection makes it seamless and secure to get the most critical data into reviewers' hands as soon as possible.
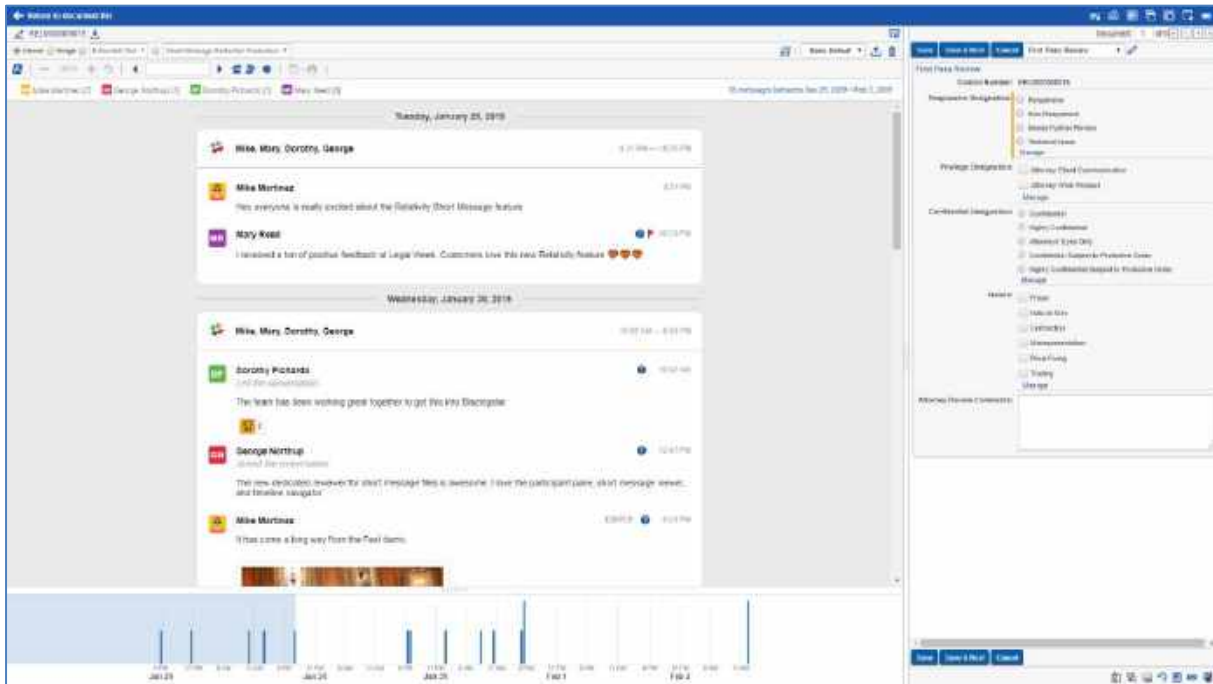

Processing – Relativity Processing is tightly integrated into RelativityOne, so you can process and review data without ever leaving the system. An inventory option provides quick insight into your data and allows you to remove irrelevant files based on a date range, sender domain, and other high-level filters prior to fully processing documents for review. Reports, email notifications, and real-time status updates provide complete visibility into your processing job.

ECA & Investigation – Leverage a repository workspace to complete early case assessment and store coding decisions – all at a discounted rate. This workspace helps you streamline the process of understanding and culling data, providing only the functionality required to process collected data in a single searchable workspace, and start applying parameters to identify documents relevant for review.

Review & Productions – RelativityOne allows you to tackle all document review and production challenges, from the smallest to the most complex projects. Everything that you need to move from review to production can be found within a single platform. One of the latest capabilities is short message review. As the way people communicates has shifted toward more texting, instant messaging, collaboration tools, and social
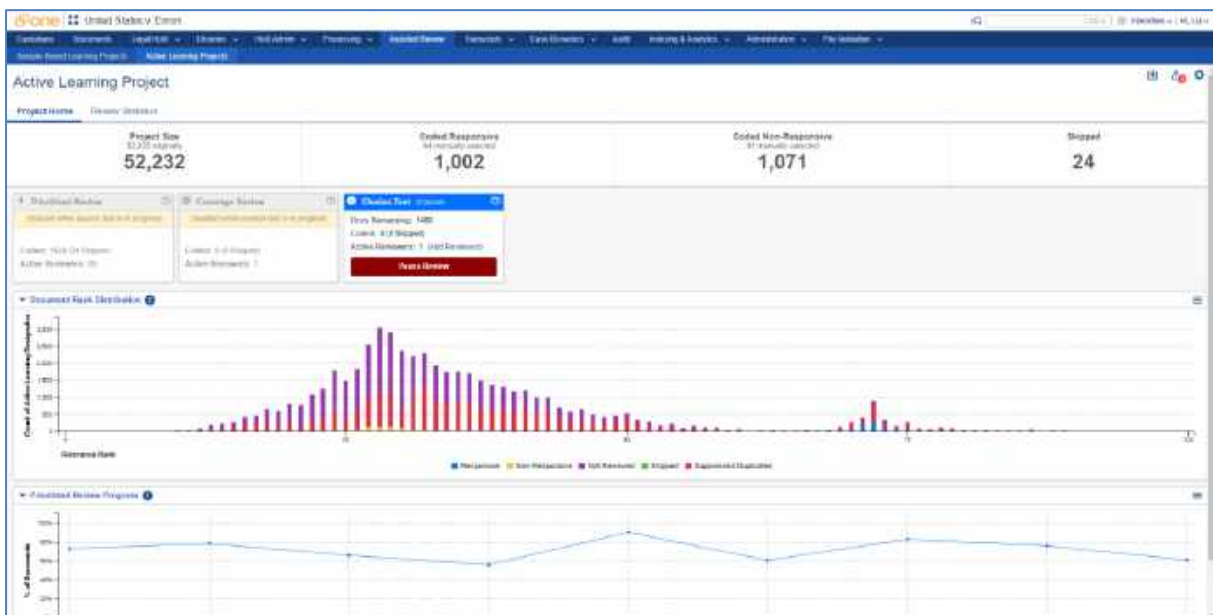

platforms, Relativity has developed the Relativity Short Message Format to help you seamlessly review, analyse, and produce short message data from SMS, MMS, iMessage, Slack, Skype, Bloomberg, and other sources. This provides a holistic view of communications across multiple channels – critical to understanding the entirety of dialogue between individuals involved in a matter.

Short Message Review

Analytics & Assisted Review – Relativity Analytics and Assisted Review amplifies your e-disclosure efforts with visual data analytics and machine learning technology. You can bring in analytics at any time in your project, from early case assessment through production. Proven effective by hundreds of organizations and approved by courts across the globe, Relativity Analytics empowers you to investigate and review data faster with the control and flexibility you need to do it accurately and defensibly.

Active Learning

Case Strategy – With Case Dynamics, you can manage your case strategy from a single location, alongside your e-disclosure efforts, to stay organized and focus on finding the truth. A complete toolset lets you share findings with your e-disclosure team and adapt your approach as you uncover the facts, making it easy to build your strategy through the entire case lifecycle. The latest capability added to help with case strategy, transcripts, is an application in Relativity to upload, review, and take action on transcripts to better prepare for trial.

Case Dynamics

VerQu Phoenix, VerQu Hydra, and VerQu Hive

In January 2021, Relativity announced it had acquired VerQu, adding VerQu's offerings, VerQu Phoenix for data migration, VerQu Hydra, the communication capture platform, and VerQu Hive for NetDocuments.

RelativityOne Redact and Milyli Blackout for Relativity Server

In February 2021, Relativity announced that it had reached an agreement with Milyli to add Milyli Blackout to RelativityOne as a new offering, RelativityOne Redact, embedded into RelativityOne's Aero UI for automated image and native redactions. Milyli will continue to develop and support Milyli Blackout for Relativity Server customers and will offer it as a separate application.

Text IQ for Privacy, Text IQ for Legal, Text IQ for Compliance, AI for Good

In May 2021, Relativity announced that it had acquired Text IQ, a Top 100 AI company applying artificial intelligence (AI) to identify sensitive data. Relativity's Text IQ leverages the latest in unsupervised machine learning (ML), graphical modeling, social network analysis (SNA), natural language processing (NLP), and deep learning to create AI solutions for the world's largest enterprises to manage and mitigate risks in enterprise data.

Relativity Patents

Relativity Patents is a new Relativity solution, bringing the leading legal platform to patent search and analytics, using machine learning, Boolean, and data visualization strategies to ensure users are reading the patents that matter most.
