

8.2.21 iCONNECT

iCONNECT v10 uses our new innovative features such as Oversight; quickly identifies mis-classified documents, CAL; Continuous Active Learning platform that quickly identify and focus on documents that really matter and COVER; a module that gives you identification, report and redaction/blackout of PII, PHI, sensitive data or keywords to comply with CCPA and GDPR standards.

>Enhanced Security

iCONNECT v10 has passed rigorous testing of US government's FedRAMP security resulting in even more control applied to your hosted data. With 9 layers of security including the ability to integrate with Active Directory, you can restrict view, edit and delete functions by user or group down to the meta-data/document level.

>Faster UX

iCONNECT v10 brings a whole new level with Faster UX. Restyled and redesigned with the latest browser technologies for a crisper and more intuitive user experience.

>International Ready

With 8 languages to choose from (including German, Spanish, Mandarin, French and more) interacting with iCONNECTv10 has never been easier.

>Thumbnails, Facetted Search and more.

We've taken 'ease of use' to the next level with thumbnails, drag/drop, custom folder templates and uber simple searching. Finding document is as easy as booking travel or buying on Amazon with 'facetted search'.

>GDPR Ready with COVER

iCONNECT v10 is in sync with recent EDM and GDPR changes, helping you identify sensitive information and PII in every document and throughout the lifecycle of your matter. Once identified, use PII redaction with COVER. The COVER module gives you identification, reporting and redaction/blackout of PII, PHI, sensitive data or keywords to comply. Exclusive to iCONNECT.

>Charts and Graphs

From tally of meta-data, progress reporting or user metrics through analysis, easy charting and graphing of data is only one click away. You can even share them with co-workers through iCONNECTv10's 'project dashboard'.

>Oversight

Take it up a notch with OVERSIGHT. iCONNECT v10 tracks progress and quickly identifies mis-classified documents and potentially unfocused review team members. Powered by Sentic. Exclusive to iCONNECT.

>Continuous Active Learning

Aim higher with CAL. iCONNECT v10 is eDiscovery's most intuitive Continuous Active Learning (CAL) platform helps you quickly identify and focus on documents that

really matter. Powered by Sentio. Exclusive to iCONNECT.

>Video and Audio Management

View, listen, tag and comment linked to timestamps in video and audio files as part of a seamless eDiscovery workflow.

>Deployment Optionality

Adhere to your firm’s infrastructure and security policies with Deployment Optionality. iCONNECT v10 allows placement of the iCONNECTv10 system behind your firewall, at a data center, with one of our worldwide LSPs, hosted or infrastructure only.

>Self Serve

Own your project with Self Serve. iCONNECT v10 is has a full self-serve environment to help create, upload and onboard any project to get review started quicker. Complex project workflows can be saved as templates for easy re-use from case to case.

>More Transparency

iCONNECT v10 is fully tracks user activity metrics for resource management and simplified licensing and billing reports for calculation by project/case and user metrics.

>Now with MOBILE upload and review [mobile screenshot]

Whether you’re in the field or at a client site, the ability to access your information is seamless, even from a mobile or tablet device.
