

8.2.29 Lionbridge Connector for Relativity

Relativity has rapidly grown to become the leading platform to manage the e-discovery process and Electronically Stored Information (ESI). As a result of Relativity’s growth, the need to translate multilingual content has exploded. International investigations and disputes generate thousands, or even millions, of pages of foreign language data. Lionbridge offers a solution to help global law firms and corporate legal departments more effectively and efficiently deliver cross-border e-discovery (e-disclosure) programs and other multilingual work within the Relativity platform.

Lionbridge Translator for Relativity revolutionizes and democratizes translations within Relativity. It puts you and your team in control of the translation process. Within the application, users will have access to both our secure Machine Translation technology, as well as our expert human translators. With Machine Translation, instead of receiving translations in days or weeks, you will get them in seconds or minutes. In addition, an in-app “easy button” will give you access to Lionbridge’s expert translators, project managers and Quality Assurance (QA) staff when you have documents that require certification or exceptional quality achieved only by “the human touch.”

Hundreds of leading law firms, corporate legal departments and e-discovery providers around the globe have trusted Lionbridge for fast, accurate legal translations for more than 20 years. Now, Lionbridge Translator for Relativity® provides Relativity users with exclusive access to the full range of Lionbridge’s translation capabilities, tools and services, right from their own laptops or desktops. With Lionbridge Translator for Relativity®, e-discovery, legal technology, legal operations, and litigation support teams can gain more control over the translation process by being able to:

- Rapidly translate one, many or all foreign language documents within your Relativity document list views on a self-serve basis
- Create matter-specific translation glossaries using patented Lionbridge technology to ensure every translation is delivered in an optimally client-centric manner
- Get an instant cost estimate before proceeding with any machine translation job
- Review and edit translated material in an “Action & Insight Panel” when documents require additional attorney or reviewer scrutiny, such as for contracts
- Quickly and easily send documents to Lionbridge securely when translations require certification or expert human translation quality
- Monitor the status and completion of ongoing projects
- Review order/job history and associated spend
