<p><u>Company Description</u></p> <p>Aon’s Cyber Solutions dedicated Investigations &amp; Response team (formerly Stroz Friedberg) specialises in complex investigations with leading experts in digital forensics; cyber incident and data breach response; internal investigations; eDiscovery; intellectual property; compliance technology, threat intelligence, vulnerability assessments, and due diligence.</p> <p>We have supported some of the most sensitive regulatory, internal and cyber investigations, and have a proven track record of working closely with our clients to dramatically reduce investigation timelines, deliver sound and actionable findings, and deliver substantial cost savings to businesses and legal advisors.</p> <p><b>Our key ingredient is the combination of our diverse skill sets and expertise all working together to deliver on your most complex cyber challenges across the entire cyber risk value chain. We are the go-to firm for organisations and their law firms in investigating ninety percent of the highest profile breaches in the last decade, including serving Fortune 100 companies, 80% of the AmLaw 100, and the Top 20 UK law firms. Learn more at <a href="https://www.aon.com/cyber-solutions">https://www.aon.com/cyber-solutions</a></b></p>	
<p><u>Vendor Offerings</u></p> <p><b>How can we help you to reach a successful outcome with Discovery and Disclosure?</b></p> <p><b>Core eDiscovery Services:</b> Our eDiscovery service offerings go beyond standard processing, analysis and production services, bringing our ingrained investigative and analytical approach to solving any data interrogation or disclosure requirement. Our problem-solving approach and goal-oriented eDiscovery &amp; Disclosure workflows are designed to meet the needs of any matter, defensibility and proportionately. We show our clients time and time again that scoping and targeting the right data sooner in the process results in huge reductions in effort and review costs later. We provide proactive guidance and leverage the newest technologies and smart approaches to generate meaningful information early on and reduce volumes along every step of the workflow.</p> <p><b>Consulting &amp; Subject Matter Experts:</b> Providing advice and guidance throughout the process is routine, not the exception. Our experts can help in countless ways - from guidance with negotiating an efficient disclosure plan; building an efficient and defensible cross-border workflow; designing a “proof of concept” exercise for a unique inquiry; advising on internal investigation approaches; document authentication including analysing produced documents to find evidence tampering or defending against claims of tampering; and all the way to helping validate and defend the final results of your review.</p> <p><b>Technology-Assisted Review &amp; Machine Learning:</b> Our tools and workflows make full use of “TAR 2.0” technologies, such as continuous, active, and multi-modal learning, that are language-agnostic. We have the ability to apply powerful machine</p>	

learning to handle real-world challenges like internal investigations and lines of inquiry; apply early intelligence to subsequent case developments and rolling collections; and effectively reuse existing attorney decisions on relevance, private or privileged information, and cull clearly irrelevant material up front.

**Digital Forensics, Preservation & Collections:** We are leaders in the field of digital forensics and help shape best practices on digital investigations and risk management and are recognised industry experts. We are credentialed in network, database, mobile device, and other forms of digital forensics; malicious code and other types of malware; computer fraud and abuse; and data discovery, analytics, and disclosure.

**Expert Services:** Recognized in the field, our experts have been certified in multiple jurisdictions around the world and are regularly seen as the “go-to” firm for expert witness testimony, formal reporting to law enforcement, and critical technical advisory support in regulatory inquiries and enforcement actions. Our expert witnesses are worldwide leaders in the areas of cybercrime and digital forensics who are credentialed, published, and certified, with years of experience pursuing complex cases alongside accomplished lawyers. Our witnesses provide testimony on the validity of the forensic data, the reliability of chain of custody, and our findings and forensic analysis. We deliver expert evidence and stand up to cross-examination. We also act as a court’s independent expert in forensic investigations and electronic discovery/disclosure matters.

**Intelligence & Investigations:** Our team help our clients with identifying the risks that they are exposed to, as well as open-source intelligence to assist in a fact investigation and help generate relevant lines of inquiry for an investigation or dispute situations. With this information our clients can make better-informed decisions about case strategy or responding to an incident.

**Data Breach Support:** Whether caused by bad leavers, internal bad actors, state sponsored organizations, hackers, or by accident, data breaches are an everyday threat and top concern. We give you a quick-acting team of incident responders who will help to deliver less damage, and ultimately less reputational and financial fallout. They will contain the incident while preserving evidence, screen exposed data for personal data using sophisticated software and search methods to help ensure you meet data privacy law reporting requirements, and confidently communicate with your stakeholders.

**Global Locations:** We can host data in our highly secure data centres in the UK and the US. Our technology supports foreign languages and our support teams include native speakers in local languages.

**Enterprise Advisory Services:** Building on our core expertise and experience in eDiscovery, Investigations, and Response, we regularly advise our law firm and corporate clients through a range of complimentary services designed to reduce their critical information risks including:

- Cyber Security Assessment, Test and Advisory Services
- Cyber Incident Response – in the event of a cyber incident or personal data breach

**Proactive Cyber Risk Assessments** – including Threat Intelligence Review & Monitoring, Individual & Entity Vulnerability Assessments, Cyber Threat Hunting, and Compromise Assessments

- Information Governance Consulting – supporting clients to develop and mature corporate information governance programs

- **Managed Services Consulting** - Our managed services engagements provide consulting services on a broad spectrum of issues covering cyber risk, eDiscovery and beyond.

### Solutions

**Defensible Collection:** Whether for litigation or an investigation, whether forensic, targeted, or even covert, we can handle it and make sure it's done right.

**Intelligent Data Culling:** We apply tested methodologies to help quickly identify and set aside objective irrelevant or low-priority data early in the process, minimising "false positives" and allowing matter teams to focus on the most interesting and important material.

**NOMAD Portable Discovery & Disclosure:** Our self-contained appliance that is deployable anywhere in the world. No matter the size, location, or complexity of the matter, NOMAD provides clients with a secure, powerful, and flexible system for sensitive investigations and electronic discovery/ disclosure projects.

**Multiple Language Support:** Includes machine translation, language identification, Multilanguage entity extraction and tokenization, native language search and review, and full support for multi-byte character sets throughout the process.

**Cross-Border Workflows, including Privacy Analysis & Redaction:** Leverage capabilities in multiple jurisdictions and expert consulting to design workflows that reduce risk and comply with data protection requirements (including analytics and sampling to help identify at-risk data; streamline review; and automate redactions)

### Processing

Our processing solutions, Nuix and Relativity, handle the most challenging data volumes and types.

### Brainspace™ Analytics

Our analytics options help lawyers winnow data and prioritize key documents for litigation and investigation. Brainspace™ Analytics helps you quickly explore, and cull large data sets with powerful visual analytics, concept search, query expansion, clustering, and communications network analysis. Brainspace Advanced Document Classification supports continuous multi-model learning (TAR 2.0) as well as traditional Predictive Coding (TAR 1.0) workflows. Our teams are certified in each of the applications named above and have multiple years of experience in both typical litigation exercises and more targeted investigations.

### Review

Aon's Cyber Solutions supports Relativity to provide native review, enhanced search, near duplicate identification, concept clustering, and multiple reporting options.
