<p><u>Company Description</u></p> <p>Rational Enterprise was founded in 2006 by the founders of the then most successful provider of hosted e-discovery document review and production services.</p> <p>Rational is headquartered in New York and has additional offices in Albany, Miami and London and is one of a few companies left that are family owned and managed.</p> <p>Rational's London office provides full local support with data hosted in the UK and a full team of consultants and project managers.</p> <p>Rational is a technology and services focused company. Rational work with law firms and large multi-national corporations in both the US, South America and Europe. Rational provide a full range of eDiscovery services utilising proprietary software and a sophisticated information governance solution, that has been purpose built from the ground up as an information governance solution for corporations.</p>	
<p><u>Vendor Offerings</u></p> <p><b>eDiscovery Services</b></p> <p>Rational provide a full range of on demand eDiscovery services which range from:</p> <ul style="list-style-type: none"> <li>• Forensic consultancy and collections.</li> <li>• Senior consultancy advising on strategies and approach.</li> <li>• Data processing and hosting.</li> <li>• Project Management.</li> <li>• Cutting edge analytics and predictive coding technology.</li> <li>• Proprietary review platform – Rational Review.</li> <li>• Managed Services.</li> </ul> <p><b>Processing and Hosting Onsite – Multi-Jurisdictional</b></p> <ul style="list-style-type: none"> <li>• One advantage of utilising proprietary software and the cloud is that Rational can spin up an instance of Rational Review in any jurisdiction quickly and cost effectively, as there are no additional licence fees to have a separate instance.</li> </ul> <p><b>Review Platform – Rational Review</b></p> <ul style="list-style-type: none"> <li>• Rational utilise a proprietary review platform, which provides cost benefits to our clients, with the same level of functionality as leading platforms on the market.</li> <li>• Rational Review was created by a litigator to be used by lawyers.</li> <li>• Rational Review focuses on the user to provide a more intuitive interface for lawyers and a unique and much easier and efficient method of searching.</li> </ul>	

- Rational Review includes cutting edge analytics and predictive coding technology.
- Law firms have deployed Rational Review behind their firewall as their in-house internal review platform.

### **Information Governance – Rational Governance**

- Rational Governance (RG) is a proprietary technology that has been built from the ground up as an information governance platform. RG has been deployed in companies in both the UK and US, including leading defence companies, government agencies, pharmaceuticals and financial services firms.
- RG manages a firm's data whilst the data remains in place, there is no duplication or requirement to move physical data outside of the firm's control or to move the data from where it currently resides.
- Once installed the technology will cost effectively assist companies with the following challenges:
  - eDiscovery Response - collating, preserving, searching and analysing information in place, including implementing instant legal holds across the firm's data universe, including desktops and laptops.
  - Automate the response for data subject access requests.
  - Assist with regulatory compliance – enables firms to react much quicker than other firms and in a much more cost effective and proportionate manner.
  - Complete internal investigations without impacting the firm's internal resources.
  - Effective records management, including automating and enforcing a firm's retention, deletion and/or archive policies.
  - Defensible data legacy clean up.
  - GDPR Compliance.
  - Data breach.
