| <p><u>Company Description</u></p> <p>DISCO provides a cloud-native, artificial intelligence (AI) powered legal solution that simplifies edisclosure, legal document review and case management for enterprises, law firms, legal services providers and governments. Our scalable, integrated solution enables legal teams to easily collect, process and review data that is relevant or potentially relevant to legal matters.</p> <p>DISCO was founded by lawyers, for lawyers with a vision to help legal professionals deliver the highest quality of services through innovative and efficient technology. Thus, by leveraging DISCO technology, lawyers are able to focus on the practice of law. Our edisclosure platform was born out of a frustration with conventional legal tools that were slow and difficult to use. Instead of forcing lawyers to adapt to technology, DISCO invented technology that works the way lawyers work. DISCO’s cloud-native edisclosure platform was the result, and today, DISCO is one of only a few publicly traded enterprise legal technology companies in the world.</p> <p>Not only does DISCO’s edisclosure solution optimise legal processes, but its advanced artificial intelligence gives precise predictions in a fraction of the time required for traditional review. Our AI understands what is relevant to your review — examining the document, words, and sentence structure to deliver intelligent, and accurate insight as to whether or not the document is of substance.</p> <p>In addition to its market-leading technology solutions, DISCO also offers expert end-to-end professional services to provide consistent, high-quality results. Services include forensic preservation and collection, data services, project management, and managed review.</p> <p>With the rapidly increasing volume, variety, and velocity of data, legal professionals are increasingly turning to DISCO as their trusted innovation partner. Law firms and legal teams recognise that DISCO is not only improving the practice of law today, but is also developing solutions that continually utilise technology as legal risks, obligations, and obstacles evolve.</p> | |
| <p><u>Vendor Offerings</u></p> <p><u>DISCO Edisclosure platform (DISCO Ediscovery):</u></p> <p>An all-in-one cloud-native solution, DISCO Ediscovery delivers high-speed data transfers, processing, review, search, and production capabilities with a turnkey infrastructure delivery model that requires no upfront investment in software or services. DISCO’s Dublin-based data centre complies with GDPR privacy requirements and provides enterprise-grade information security.</p> | |

DISCO Review: Using cutting-edge AI technology paired with AI-optimised workflows and deep legal expertise, DISCO’s managed reviews are regularly 60% faster than the industry average, with an average review speed of 88 documents per hour. The speed and accuracy that the DISCO platform delivers, coupled with an unrivalled team of industry veterans and DISCO power users, makes managing review deadlines easier. Our simple flat-rate pricing models eliminate surprises and allow for predictability and better budget planning. Moreover, with DISCO you don’t pay additional costs for things like user licences, ingestion, processing or production. Whether you choose our case-based transactional pricing or one of our yearly subscription models, you get unlimited access to all the capabilities in the product.

DISCO Professional Services: From project management to data services, DISCO’s dedicated staff of legal technologists and edisclosure professionals are available to help consult with clients in regard to search, investigative needs, and utilising AI to deliver value and extraordinary outcomes. Moreover, when it comes to price — build the service package that best fits your needs.

DISCO Forensic Services: To help legal departments easily perform a comprehensive collection, DISCO provides a full suite of end-to-end forensic services, which include forensic preservation, collection, analysis, and consultation, performed by experienced Certified Forensic Examiners using defensible processes and methods.

DISCO Hold and DISCO Request: DISCO acquired legal workflow products Hold360 and Request360, as well as related regulatory and alert solutions, from Congruity 360 in February 2022. Hold360 and Request360 are next-generation, streamlined technology solutions that eliminate the challenges from legacy solutions, which relied on human processes, teams of lawyers and legal professionals, and limited technological solutions to ensure compliance with legal preservation obligations.
