<u>Company Description</u>	
<p>Founded in 2002, CloudNine is an on-premise and SaaS software company. We offer the flagship CloudNine Review SaaS-based eDiscovery platform with self-service processing, analysis, review, and production for both traditional and modern data. CloudNine simplifies the legal process and provides complete confidence in your data. We build seamless and frictionless solutions that put power behind your data and eliminate unnecessary stress.</p>	

Software Information

[Our SaaS Solutions](#)

CloudNine Law in the Cloud® Leverage the industry standard in processing without infrastructure requirements using the most comprehensive processing, imaging and production solution on the market.

CloudNine Analyst provides the only solution to organize all modern data types in a single platform to tell the entire story. It allows you to ingest, cull, investigate, and assemble multiple modern data types while preserving the order and context to facilitate investigation and review. Data types handled include SMS, calls, MMS, Slack, MS Teams, WeChat, Skype, geolocation, YouTube, TikTok, Twitter, Facebook, financial records, computer forensic artifacts and more.

CloudNine Review™ Streamline the discovery, investigation, and audit process for attorneys and compliance managers. CloudNine Review simplifies the discovery process by allowing you to upload documents quickly and begin reviewing your document collection within minutes.

[On-Premise Solutions](#)

CloudNine Explore™ Enables your legal teams, investigators and auditors to investigate issues, assess risk, confirm compliance and begin early case assessment quickly and easily to find the important data to complete your organization's goals.

CloudNine Concordance® Import, review and produce eDiscovery documents in-house at an attractive annual predictable cost. Add more users as needed for collaboration and faster review. And this can all be deployed on a small, manageable computing footprint.

CloudNine LAW® Reduce the cost of the discovery process with the most comprehensive processing, imaging and production solution on the market.
