Vendor Name: IPRO	
Giorgia Favaretto-Illig +1(619)886-8165 Gfavaretto-illig@ipro.com	
1700 N Desert Dr #101, Tempe, AZ 85281	
Company Website. www.ipro.com	
<p><u>Company Description</u></p> <p>IPRO is a global leader in the development of advanced eDiscovery software and information governance for law firms, corporations, government agencies, healthcare organizations, and legal service providers. Founded in 1989 and based in Tempe, Arizona, IPRO is known for its best-in-class information governance, eDiscovery, and trial presentation solutions that deliver early data assessment (EDA) as well as real-time, hold-in-place data preservation, analytics, and review.</p> <p>With 280 employees, IPRO is able to serve over 2,000 customers globally including US, Canada, the Netherland, the UK, and Germany. In 2021 IPRO launched Live EDA the only search in-place solution that enables legal teams to respond to their matters in a fraction of the time by conducting Early Data Assessments on live data where the information lives, before any collection occurs.</p> <p>More information can be found at <a href="http://www.ipro.com">www.ipro.com</a></p>	

**Software Information**

**Information Governance (ARCHIVE, ENFORCE, REMEDIATE):** Organizations generate vast amounts of data, often from multiple sources. With many of them moving their operations to the cloud, they need a reliable way to keep track of, secure, and manage their sensitive data. There are also regulatory requirements that businesses must adhere to remain compliant. IPRO IG solution helps organizations effectively handle large volumes of data, identify, classify, and analyse the data, as well as clean up ROT (redundant, obsolete, and trivial) data. We reduce data access risk while also securing sensitive information – preventing data breaches and ensuring businesses remain compliant with regulations.

**LEGAL HOLD** empowers organizations to avoid sanctions and data spoliation by automating their legal hold process. With LEGAL HOLD, organizations have a defensible process and are prepared to respond with a mature litigation readiness solution. When the need arises, they can instantly issue a hold to all custodians and preserve all information from one compliance-friendly solution. They can build a chain of custody, let the system track all custodian actions, and remove human error by centralizing their preservation process instead of involving multiple departments and requiring manual entries. When everything is fully automated, organizations using LEGAL HOLD can focus on what’s important, simplify their end-to-end workflow, build consistent messaging, and easily keep up with custodian responses while ensuring custodians are kept accountable.

**eDiscovery software:**

- Live EDA is the only eDiscovery solution that lets your team conduct Early Data Assessments on live data where the information lives, before any collection occurs.** With Live EDA, legal teams can search, filter and query all data sources (including Slack, Egnyte, and Microsoft Teams) from one interface without having to collect all data, enabling them to gain insights earlier in the eDiscovery process, use AI-assisted analysis to help predict which files contain the most relevant data, and ensure only the data that needs final

review by counsel gets collected. With less data being collected, processed and hosted, customers can enjoy drastic reductions in review turnaround times and expenses, often of 80 percent or more.

- **OPEN DISCOVERY (for Law Firms)** is a **powerful review technology, easy-to-use eDiscovery solution** that arms law firms with a highly scalable, best-in-class document processing engine and seamless workflow integration, all while reducing cost and risk. Its multi-threaded, fully distributed processing model ensures that productivity is never compromised, while the user-friendly interface and high-quality imaging makes it easier than ever to conduct review. And with virtually limitless processing speed and power infused with advanced analytics, no dataset is too large, and no deadline is too tight.
- **ZyLAB ONE (for Corporations)** is the complete end-to-end eDiscovery solution that helps corporations uncover and review critical information buried within their organization's documents and files. Legal teams use ZyLAB ONE to resolve complex internal investigations, tackle regulatory requests, meet data privacy obligations, and perform smart eDiscovery for litigation readiness.

**Trial Director 360** streamlines pre-trial, trial, mediation, and other litigation related presentations. Trial Director is the most flexible and widely used trial presentation software available. Easily manage, organize, annotate, and customize exhibits for large or small cases.
