<u>Company Description</u>	
<p>Insight Optix is a legal technology company with the first and only SaaS-based solution in the market that addresses the longstanding problem of excessive and overzealous discovery. Its industry-leading technology and patented workflow, Evidence Optix®, empowers early discovery scoping, budget projections, proportionality analysis, and data source tracking throughout the litigation lifecycle.</p> <p>Insight Optix is proud to be a WBENC-certified company that employs experts with decades of industry experience.</p>	

## Software Information

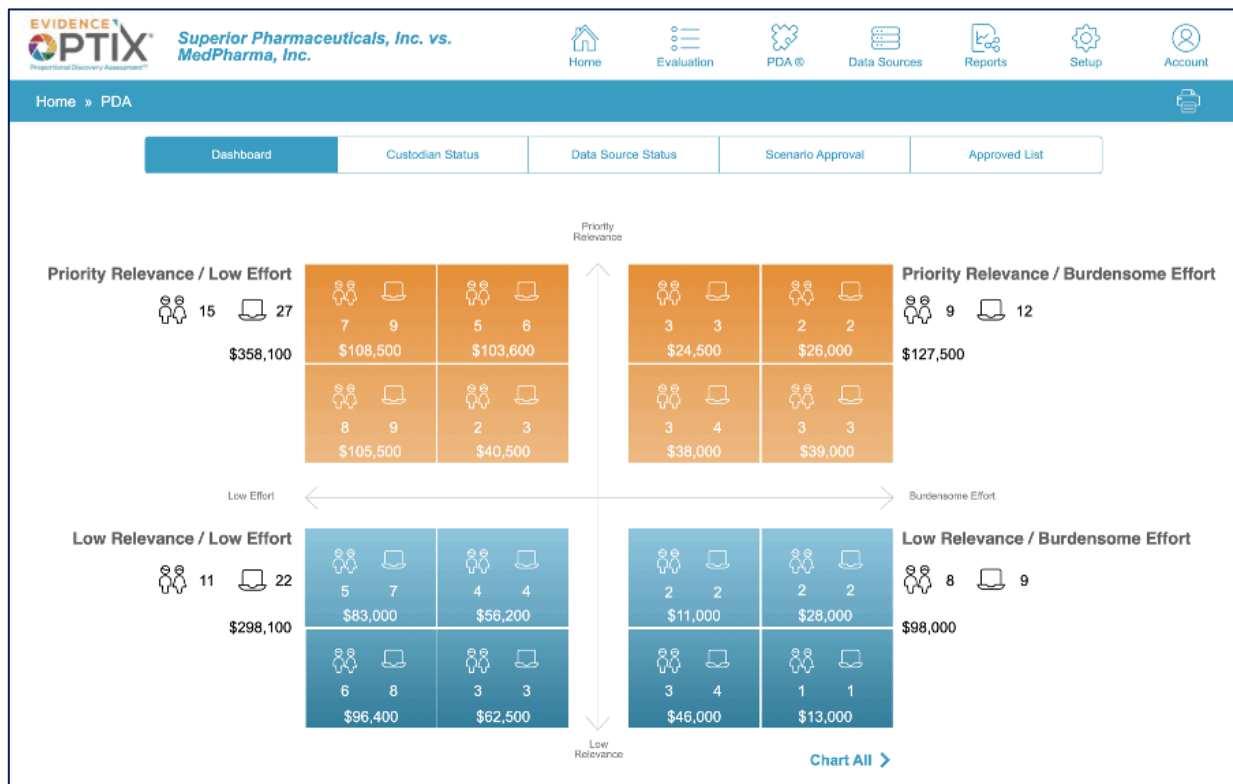

Evidence Optix® (EO) empowers early discovery scoping, budget projections, proportionality analysis, and data source tracking to reduce costs and risk throughout the litigation lifecycle. An attorney-driven SaaS solution, EO employs a simple, yet powerful workflow that commences in the gap between legal hold and collection – where early decisions significantly impact cost and burden downstream.

EO is user friendly, requires no software installation, employs no “black box” algorithms, and can be spun up in just a few days, so you can start experiencing the benefits of EO on your next matter.

This game-changing framework:

- Guides legal teams through a systematic custodian and data assessment
- Ranks custodians based on their level of importance
- Scores data source burden and effort
- Calculates real-time cost projections
- Enables scenario generation for budgeting, negotiation, and proportionality arguments
- Provides a dynamic iterative process as the facts in dispute are refined
