| <u>Company Description</u> Intellectual Data is a reliable and professional Asia-centric boutique eDiscovery service provider. We provide a full scope of the EDRM process along with managed review and translation services with proficiency in a cost-effective manner. Our robust security and technology practice provides the client with a comprehensive suite of the secured environment of the client's data and cost-effective solutions to eDiscovery, data analytics, and other litigation support needs in the Asia Pacific and the US. With extensive support in APAC and US regions, Intellectual Data provides clients with 24/7 real-time support provisioning any review support needs in both US and APAC. Please visit www.inda.kr for more information. | |
| <u>Vendor Offerings</u> Intellectual Data provides the full scope of eDiscovery service from the on-site forensic collection to the Production in the APAC and across the US regions. Our team has high expertise on various eDiscovery platforms as required. Our most preferred solutions are the Relativity and the Reveal, as our experts are certified administrators with these solutions. | |
